Nerjis Alshuhani

Skills

- Programming languages: C++
- Organization skills
- Teamwork: Collaborating with others
- Creativity
- Software: Visual Studio, Unity
- Knowledge of artificial intelligence

Projects

Project Name - The Game Fixers

Semester: Fall 2026 - (currently not finished)

- Developed a project to demonstrate skills in Software Engineering I
- Worked with a team to develop function and non-function requirements needed to complete the project overall
- Made models such as a class diagram and a design prototype
- The team has not implemented the project yet as there are still things needed to complete or fix before doing the testing stage.
- The project is designed to log, track, and resolve bugs in a video game by having the idea of a collaboration between developers and testers. The resolved bugs can later be added to the client dashboard.

Project Name - Garden of Hope

Semester: Fall 2026 - (finished)

- Developed a 2D game project to demonstrate skills in Game Design and Implementation I
- Made improvements and refined the design with assets in the Unity store while testing the game.
- Demonstrated a basic garden and healing game of plant growing and healing systems
- Programmed the player movement and interactions in C# with little experience
- Added a win condition where the can player reach in the healing progress
- The game was developed by me as an individual project
- Used softwares: Visual Studio 2026 and Unity Unity 6.3 LTS/6.6

Project Name - BookStore-Fable Worlds

Semester: Fall 2025 - (finished)

- Developed a custom project to demonstrate skills in Computer Science II
- Tested the project and made improvements based on the results and design
- Worked with a team to complete the project requirements such code, some sort of document to demonstrate the project, and presentation
- There are implementations that require C++ and each individual member was given roles to complete a class diagram, classes, etc
- The code includes a welcome message and a menu where the user can input a number and scroll the info based on what's added in the menu
- The menu contained what's on sale or what's in the bookstore overall
- The code was implemented through Visual Studio 2022
